This statistical compilation presents the preliminary results and analytical materials of the Population and Agriculture Census of the Republic of Uzbekistan, 2026 (hereinafter referred to as the census), reflecting the current state of demographic, socio-economic and agrarian processes in the Republic, and is intended exclusively for statistical and analytical purposes.

The principal aim of this publication is to provide users with a timely presentation of the preliminary results of the census, as well as to set out the country's key demographic, socio-economic and agrarian indicators in accordance with the Recommendations of the United Nations Conference of European Statisticians for the conduct of population and housing censuses, the recommendations of the United Nations Population Fund (UNFPA), and the World Programme for the Census of Agriculture of the Food and Agriculture Organization of the United Nations (FAO).

The publication is intended for bodies of state authority and administration, international organisations, scientific institutions and a broad range of users with an interest in up-to-date statistical information on the population and the agrarian sector of the country.

The preliminary results of the census have been published on the web portal of the National Statistics Committee of the Republic of Uzbekistan in three languages – Uzbek, Russian and English – at: <https://aholi.stat.uz>.

This publication contains preliminary data. Upon completion of all stages of statistical processing, the information will be refined in accordance with the established national and international statistical standards.
